

I DREAM (Starlight)

© 2018 and 2021 Robert Leaman Sanders

And I dream one day the world will love starlight

I dream of how our hearts will stop the fight

I close my eyes I dream with all my might

And I dream we will one day all be free

I dream of a better life for you and me

A dream starts with a dream then comes to be

Wouldn't you like to go where the people love to let the sunshine
through In blue skies too

Wouldn't you like know that the people all around you really care
to clear the air, and they know how, they are with you here right
now . . . Wow!

And I dream we will one day all be free

I dream of a better life for you and me

The dream is real when the dream... Takes you home and brings
through the night to the light

Don't you really love the light ~ ASCAP
